## Skills

---

**Programming Languages:** PHP, TypeScript, JavaScript, SQL, HTML, CSS

**Frameworks, Libraries, and Environments:** Laravel, Vue, React, Next.js, Redux, NodeJS, Tailwind CSS

**System & Database:** Git, Linux, Ubuntu, Nginx, SQL Databases (Postgres, MySQL)

**Other Skills:** Adaptability, Team collaboration, Critical Thinking, Empathy, Communication

## Experience

---

**Full Stack Web Developer**, 14 Oranges – Remote

02/2023 – Present

- Specialized in PHP, JavaScript, and CSS, enhancing WordPress themes and integrations.
- Managed full lifecycle of server deployment on Ubuntu and Nginx, including configuration and maintenance.
- Collaborated directly with clients, from chefs and business owners to healthcare professionals, to tailor solutions to their needs by breaking down complex concepts using familiar analogies.
- Led projects from the ground up, scaling to hundreds of online orders per day as the sole and lead developer.
- Worked closely with designers, QA, and sales to ensure the product met or exceeded client expectations while staying within budget and time constraints.
- Demonstrated exceptional interpersonal skills, establishing strong relationships with clients and enhancing team collaboration.

**Lead (Associate Manager)**, Apple – Richmond, BC

10/2019 – 02/2023

- Supervised a team of 100+ employees across all areas of the business.
- Developed and facilitated storewide meetings, workshops, and team training & onboarding.
- Handled ambiguity by making decisions on next steps when clear solutions were not available, often coming up with innovative solutions on the fly.
- Served as the go-to person for resolving customer issues and process-related problems, balancing business goals with customer satisfaction.

## Projects

---

**Personal Website**

cwarcup.com

- Designed and developed a personal website to showcase projects and notes, emphasizing efficient and responsive design with Tailwind CSS and Next.js.
- Achieved near-perfect Lighthouse score, ensuring high performance and accessibility.
- Utilized MDX for integrating JSX in markdown documents, enhancing content presentation.
- Integrated Google Analytics, SEO-friendly features like RSS feed and sitemaps.

**PayByFonie**

paybyfonie.vercel.app

- Developed PayByFonie, an app for finding and comparing parking prices in Vancouver, aimed at saving costs and time.
- Integrated React-map-gl and Mapbox for dynamic location searching and map viewing functionalities.
- Implemented filtering by parking price and increasing search results to enhance user choice and convenience.
- Utilized Vancouver Open Data API to provide real-time parking meter data within the map's viewport.
- Enabled users to click on parking meters for detailed parking information, improving the decision-making process.
- Designed a user-friendly interface with React Icons and Tailwind CSS for an engaging and responsive experience.

## Education

---

**Lighthouse Labs** – Diploma Full-Stack Web Development

2022

**The University of British Columbia** – Bachelor's Degree Kinesiology and Exercise Science

2017
